

Cisco Data Center Assurance Program (DCAP) 4.0

May 12, 2008 this Safe Harbor stub document was created upon Cisco Data Center Assurance Program (DCAP) 4.0 test plan completion.

Cisco Safe Harbor is an initiative emphasizing customer success through improved quality. Safe Harbor delivers customers a certified Cisco OS version of choice for critical deployment to increase overall network stability.

Safe Harbor subjects targeted releases (deployed in topologies consistent with those of identified customers) to complex levels of testing. The program offers additional benefit by serving as the conduit through which customer input influences Cisco premier testing.

Cisco Data Center Assurance Program (DCAP) 4.0 summarizes system-level and reliability testing completed for the specified release. The content of this document for Cisco customers is available from your Cisco representative.

Please ask for any associated EDCS numbers listed in [Table 1](#) for full book files or [Table 2](#) for Suite component book files.

Note

Full book series files are large (20M). The Configuration Book exceeds 9500 pages which was impractical to produce. Refer to [Table 2](#) for configuration component documents.

Cisco employees may go to the Safe Harbor website for supplemental information and related testing.

The following results-oriented doc types are available for Cisco DCAP 4.0.

Definitive testing documents include:

1. **CF (Customer Facing) For public consumption.**
 - Topologies, Introductions, Procedures, Expected Results, Results, Configurations
 - No Output Graphs, No Test Output
2. **CF- (Customer Facing Minus) For public consumption.**

- Topologies, Introductions, Expected Results, Results, Configurations
 - No Procedures, No Output Graphs, No Test Output
3. **CF+ (Customer Facing Plus) For public consumption.**
 - Topologies, Introductions, Procedures, Expected Results, Results, Output Graphs, Configurations
 - No Test Output
 4. **SE (System Engineer) For internal technical use. Available Upon Request.**
 - Topologies, Introductions, Procedures, Expected Results, Results, Output Graphs, Test Output, Configurations
 5. **Configs (Configurations) For public consumption.**
 - Technology specific test device configurations (Volumes 13-28).

**Note**

CF+ documents are not available if there are no output graphs for the specific testing cycle.
