SNMP-3-TRAPSEXCEDD	3-Error	Maximum number of traps exceeded the maximum allowed in the current sync-message to STANDBY	This message indicates the number of SNMP traps defined exceeded the maximum we can accomodate in a checkpoint sync-message. You the developer need to increase SNMP_SYNC_BITMASK_MAX to a higher value. Please check smci_rf_status_event for further details.	snmp	"Developers will never see this error message."
SNMP-3-IFINDEX	3-Error	[chars] has [dec] non-positive ifIndices.	ifIndex-table file has some invalid entries that have non-positive\n\n ifIndex values. Ignoring invalid entries.	snmp	"If ifIndex-table is not needed please delete the file from nvram."
SNMP-3-SYNCFAIL	3-Error	SNMP MIB Sync Failure: [chars]	One of the SNMP MIB Sync to standby failed.	Determine the mib component from the stack trace which indicates\n\n which MIB sync failure is generating this message.\n\n Search for similiar DDTS reports and open a DDTS.	"Copy the error message exactly as it appears and report it\n\n to your technical support representative."
SNMP-3-COMMINDICES	3-Error	Some ifindices might not be persisted.	There are too many ifindices and the system is unable to persist all of them.	snmp	"Most likely this is a system limitation and there is no workaround."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Remarks
SNMP-3-TRAPBLOCK	3-Error	Attempt to generate SNMP trap from a process with blocking disabled	During processing a process with blocking disabled attempted to generate an SNMP trap which would block. This is not allowed.	Determine the component from the stack trace which indicates which subsystem is attempting to generate a trap. Search for similar DDTS reports and open a DDTS.	"Copy the error message exactly as it appears and report it to your technical support representative."
SNMP-3-TRAPINTR	3-Error	Attempt to generate SNMP trap from interrupt level	During the processing of an interrupt the code attempted to generate an SNMP trap. This is not allowed.	Determine the component from the stack trace which indicates which subsystem is attempting to generate a trap. Search for similar DDTS reports and open a DDTS.	"Copy the error message exactly as it appears and report it to your technical support representative."

Family-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Remarks
SNMP-4-HIGHCPU	4-Warning	Process exceeds [dec]ms threshold [dec]ms IOS quantum for [chars] of [chars]--result [chars]	SNMP took more than the warning threshold processing a var-binding.	Determine the component from the debug output which indicates\n\n which subsystem is processing a request. Search for similiar DDTS\n\n reports and/or based on the impact of the processing time \n\n determine if this is a bug.	

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Remarks
					<p>"If feasible use the <bold>debug snmp packet</bold> command to determine the\n\ contents of the SNMP request that is causing the message. Copy the\n\ error message exactly as it appears and report it along with any\n\ debug output to your technical support representative. Some MIB\n\ objects require a relatively large amount of time to process. \n\ MIB objects in the mibTable are processed one by one. \n\ If possible MIB objects appearing in this message should NOT be \n\ retrieved</p>

Family-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Remarks
					using multiple binding SNMP PDUs."
SNMP4INTERNALERR	4-Warning	An internal error occurred in ifindex persistence code.	There is an unexpected internal error in ifindex persistence software.	snmp	""
SNMP4NOENGINEID	4-Warning	Remote snmpEngineID for [inet] not found when creating user: [chars]	-	snmp	"\n\ Configure the remote snmpEngineID and reconfigure the user.\n\ If the problem persists copy the error message exactly as it\n\ appears and report it to your technical support representative."
SNMP4NOENGINEIDV6	4-Warning	Remote snmpEngineID for %P not found when creating user: [chars]	-	snmp	"Configure the remote snmpEngineID and reconfigure the user.\n\ If the problem persists copy the error message exactly as it\n\ appears and report it to your technical support representative."

Fault-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Remediation
SNMP-4-NOFLASH	4-Warning	Reading snmpEngineBoots from flash failed	An attempt to read the snmpEngineBoots file from flash failed.\n\n Most likely this means that the flash card does not exist on\n\n the router. This message should appear only when the router is\n\n reloaded.	snmp	"\n\n Check if installing a flash card makes the message go away.\n\n If a flash card exists already it may be full. Try erasing\n\n flash and reloading the router. If after these steps the problem\n\n persists copy the error message exactly as it appears and report\n\n it to your technical support representative."

Family-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Remarks
SNMP-4-TRAPDROP	4-Warning	[chars]	An attempt was made to generate an SNMP trap but the trap\n\ could not be sent because of the reason given in this message.\n\ Most likely this message means that the SNMP traps process is\n\ not running.	snmp	"Copy the error message exactly as it appears and report it\n\ to your technical support representative. Use the <bold>show process</bold>\n\ command to determine whether the SNMP traps process is running.\n\ If it is not running reload the system. If after reloading\n\ the SNMP traps process is still not running there may not be\n\ enough memory for it to run."
SNMP-5-CHASSSALARM	5-Notice	Chassis Alarm Trap: tmpAlarm[chars] minorAlarm[chars] and/or majorAlarm[chars]	This message shows the SNMP agent sends out the Chassis Alarm On/Off Traps to the engine ID of the remote agent or SNMP manager because the corresponding chassis alarm is on/off.	snmp	""

SPA_DAB_OUT_OF_FRAME	3-Error	[chars] [chars] - A data bus out of frame error condition has occurred	An error has occurred on the data bus between the SPA and the SIP. When this condition is occurring the interface will be down and/or not forward any traffic.	spa-infra	"Power down and reset the card." SH_SID_ACTION
SPA_DAB_SEQ_ERROR	3-Error	[chars] [chars] - A sequence error has occurred.	A sequence error has occurred on the data bus between the SPA and the SIP. When this condition is occurring a short duration of packet loss may be noticed. This condition may indicate a developing hardware failure. This error should occur very infrequently during normal operation and should not occur when no changes are made to the configuration.	spa-infra	SH_SID_ACTION
SPA_DAB_SINGLE_PARITY	3-Error	[chars] [chars] - A single DIP 2 parity error on the FIFO status bus has occurred.	The data bus interface on this line card is experiencing a hardware-related issue. Some packets may be dropped.	spa-infra	SH_SID_ACTION

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Remarks-Action
SPA4BSK0CE1PAR1Y	3-Error	[chars] [chars] - A single DIP4 parity error has occurred on the data bus.	A single parity error has occurred on the data bus between the SPA and the SIP. When this condition is occurring a short duration of packet loss and/or symptoms resulting from data corruption may occur. This condition may indicate a developing hardware failure. This error should occur very infrequently during normal operation and should not occur when no changes are made to the configuration.	spa-infra	"Power down and reseal the interface card. " SP4SIDACTION
SPA4BSK1C00R0W	3-Error	[chars] [chars] - An error condition on the data bus between the SPA and the SIP has occurred.	An error condition on the data bus between the SPA and the SIP has occurred. Possible causes include misconfiguration of Maxburst parameters incorrect FIFO sizing or FIFO threshold settings.	spa-infra	SP4SIDACTION
SPA4BSK1CUNDRUN	3-Error	[chars] [chars] - An error condition on the data bus between the SPA and the SIP has occurred.	An error condition on the data bus between the SPA and the SIP has occurred. Possible causes include misconfiguration of Maxburst parameters incorrect FIFO sizing or FIFO threshold settings.	spa-infra	SP4SIDACTION
SPA4BSK1UNDRUN	3-Error	[chars] [chars] - An error on the data bus has occurred.	In normal situation transitions from the Data Burst state to payload control or idle control are possible only on integer multiples of 8 cycles or upon end of packet. This error could happen if the MW bit flips on the bus with coincidental good dip4 or due to a misbehaving source.	spa-infra	"Power down and reseal the card. " SP4SIDACTION

SPANREF2PVSIM_CHK	2-Critical	PVST Simulation inconsistency cleared on port [chars].	The listed interface is no longer receiving PVST BPDUs advertising an information inconsistent with the CIST port information. The PVST Simulation Inconsistency is cleared and the interface returns to normal operation	stp	ICSDN_ADN

Family-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Remarks
SNRRECVNONTRUNK	2-Critical	Received 802.1Q BPDU on non 802.1Q trunk [chars] [chars].	The listed interface on which a SSTP BPDU was received was in trunk mode but not using 802.1Q encapsulation.	pvst	"Verify that the configuration and operational state of the listed " "interface and that of the interface to which it is connected have " "the same mode access vs trunk. If mode is trunk verify the same "
SNRRECVBADTLV	2-Critical	Received SSTP BPDU with bad TLV on [chars] [chars].	The list interface received a SSTP BPDU that was missing the VLAN id tag. The BPDU is discarded.	pvst	CONFERRON
SNRRECVMDERR	2-Critical	Received BPDU with inconsistent peer vlan id [dec] on [chars] [chars].	The listed interface received a SSTP BPDU that is tagged with a VLAN id that does not match the VLAN id on which the BPDU was received. This occurs when the native VLAN is not consistently configured on both ends of a 802.1Q trunk.	pvst	"Verify that the configuration of the native VLAN id is consistent " "on the interfaces on each end of the 802.1Q trunk connection. " "Once corrected spanning tree will automatically unblock the interfaces " "as appropriate."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Remediation
SPNR/ROOTGUARD/ERR	2-Critical	Root guard blocking port [chars] on [chars].	A BPDU was received on the listed interface which advertizes a superior spanning tree root bridge to that currently in use. The interface is put into blocking state and marked as root guard inconsistent in order to prevent a suboptimal spanning tree topology to form.	rootguard	"Issue the <Ctrl>B show spanning-tree inconsistent-ports command to review the list of interfaces with root guard inconsistencies." "Determine why devices connected to the listed ports are sending " "BPDU's with a superior root bridge and take action to prevent further " "occurrences. Once the bogus BPDU's have been stopped the interfaces will " "automatically recover and resume normal operation." "Make sure that it is appropriate to have root guard enabled on the " "interface."

SNRRTCLARUNOK	Severity-Meaning	Message	Message-Explanation	Component	Remarks
SNRRTCLARUNOK	2-Critical	Root guard [chars] on port [chars].	The spanning tree root guard configuration for the listed interface has been changed. If enabled any BPDU received on this interface which advertizes a superior spanning tree root bridge to that already in use will cause the interface to be put into blocking state and marked as root guard inconsistent.	rootguard	"Verify that this is the desired configuration for the listed interface." "Correct it if this is not the desired configuration otherwise no further " "action is required."
SNRRTCLARUNOK	2-Critical	Root guard unblocking port [chars] on [chars].	The listed interface is no longer receiving BPDUs advertizing a superior root bridge. The root guard inconsistency is cleared for the interface and then it is taken out of the blocking state if appropriate.	rootguard	ICSDNOACD
SNRRTCLARUNOK	2-Critical	Unblocking [chars] on [chars]. Port consistency restored.	The Port VLAN ID and/or Port Type inconsistencies have been resolved and spanning tree will now unblock the listed interface of the listed spanning tree instance as appropriate.	pvst	ICSDNOACD

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Remediation
SPNREBDRNUMSE	3-Error	Rejected an attempt to set the port number field size to [dec] bits valid range is [dec] to [dec] bits.	The spanning tree port identifier is a 16 bit wide field that is by default divided evenly between port priority and port number each sub field being 8 bits wide. This allows the port number field to represent port numbers between 1 and 255. However on systems with greater than 255 ports the size of port number portion of the port id must be increased to support the greater number of ports. This is done by the STP subsystem at system init time since the maximum number of ports on a particular platform will not change. This error would only occur due to an error in the platform specific code which caused it to request more or less	stp	"show version"
SPNREBDRNUMSE	3-Error	[chars]: Portfast disabled reverting to bidirectional mode	Because UCP is for edge ports only portfast must be configured. This message is typically seen when spanning-tree portfast is enabled on a port then authentication control-direction is set to inbound unidirectional and then	stp	"Re-enable portfast on the edge port. This will re-enable unidirectional control."

SW_VLAN/VTP_INTERNAL_FAIL	4-Warning	VLAN manager received an internal error [dec] from vtp function [chars]: [chars]	An unexpected error code was received by the VLAN Manager from the VTP\n\ configuration software.	sw-vlan vtp	CONF/CHK/CON

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Remediation
SW_VLAN/VLAN_DB_ERR	4-Warning	VLAN manager received bad data of type [chars]: value [dec] from vtp database\n\ function [chars]	Invalid data was received by the VLAN Manager from a VTP configuration\n\ database routine.	sw-vlan vtp	ICSDSICADN
SW_VLAN/VLAN_DB_ERR	4-Warning	VLAN manager received bad data of type [chars]: value [dec] while being called\n\ to handle a [chars] event	Invalid data was received by the VLAN Manager from the VTP configuration\n\ software.	sw-vlan vtp	ICSDSICADN
SW_VLAN/VLAN_SRV_PG	4-Warning	[enet] has become the primary server for the [chars] VTP feature	The primary server status has changed and the indicated device has become the primary server for the indicated VTP feature.	sw-vlan	ICSDNOADN
SW_VLAN/VTP_SEM_BUSY	4-Warning	VTP semaphore is unavailable for function [chars]. Semaphore locked by [chars]	The VTP database is currently locked by another task and is not available.\n\ Users should retry the operation sometime later.	sw-vlan vtp	ICSDSICADN
SW_VLAN/VTP_SR_NOTIFY	4-Warning	VTP protocol user notification: [chars]	VTP protocol code encountered an unusual diagnostic situation which the\n\ user should be made aware of.	sw-vlan vtp	ICGSDIADN
SW_VLAN/VLAN_CFG_OLD	6-Information	Old version [dec] VLAN configuration file detected and read OK. Version [dec]\n\ files will be written in the future.	VLAN software detected an old version of the VLAN configuration file\n\ format. It was able to interpret the file with no problems but will\n\ create files using the new format in the future.	sw-vlan vtp	ICSDNOADN

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Remarks
SW_VLAN_D_CACHE	6-Information	Unexpected vlan.dat cache exists. Removing the cache and continuing the sync with new set.	vlan.dat file is synced to the STANDBY via one or more checkpoint message from ACTIVE. The sequence number for each such set of checkpoint messages starts with 1. These messages are cached at the STANDBY till the end-of-set indication is received. Here the STANDBY received a checkpoint message with a size that does not fit the size of cache specified in the checkpoint message with sequence number 1. Please report it to Customer Support.	sw-vlan	ICSDNOADN
SW_VLAN_VTP_CFG	6-Information	VTP domain name changed to [chars].	The VTP domain name was changed through configuration to the name\n\ specified in the message. A management domain is the naming scope\n\ of a VLAN name. Each VLAN has a name that is unique within the\n\ management domain.	sw-vlan vtp	ICSDNOADN
SW_VLAN_VTP_CHG	6-Information	VLAN manager changing device mode from [chars] to [chars].	Some switch devices must automatically change VTP device modes upon\n\ receipt of a VLAN configuration database containing more than a set\n\ number of VLANs depending on the device. This message indicates that\n\ such a spontaneous conversion has occurred what the previous mode was\n\ and what the current mode is.	sw-vlan vtp	ICSDNOADN

Family-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Remarks
SW_VLAN_PRUNING	6-Information	VTP Operational Pruning [chars].	VTP operational pruning changed. This can happen due to admin pruning change VTP mode changes or VTP config propagation. 'show vtp status' output can be looked up to find the reason for this change.	sw-vlan vtp	"Check 'show vtp status' output to find the reason for this change." ICGSDN_ACDN
SW56-1-INITSYS	1-Alert	[chars]	Failed SW56 Initialization. Most likely because lacking of memory	as	"The amount of memory available in the router may not be "sufficient." ICGSDN_ACDN
SW56-3-ERR_MSGQ	3-Error	[chars]	Failed to send message to internal software process	as	ICGSDN_ACDN

SYS CHUNKVALDHR	2-Critical	Invalid chunk header type [dec] for chunk [hec] data [hec]	An inconsistency was detected while managing the chunk memory pool. The probability that this is a software error is close to 100 percent but there could be a hardware problem with memory.	-	"Copy the error message exactly as it appears on the console " "or in the system log contact your Cisco technical support representative " "and provide the representative with the gathered information. " "Save any crashinfo or crashdump files. If the router has crashed and " "was not configured to automatically reload the router will " "need to be reloaded manually."
SYS CHUNKVALDOR	2-Critical	[chars] Chunk : %lx Chunk Name : [chars] Flags : %lu	An operation intended for a type of chunk is used for a different type of chunk.	-	-
SYS CHUNKMEMORY	2-Critical	* Could not allocate chunks for [chars]. No memory	* A software error occurred.	-	* "Copy the error message exactly as it appears and report it to " * "your technical support representative."

Family-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Remarks-Action
SYS2CHUNKNOROOT	2-Critical	Root chunk need to be specified for [hec]	A software error occurred.	-	"Copy the error message exactly as it appears and report it to "your technical support representative."
SYS2CHUNKPARTIAL	2-Critical	Attempted to destroy partially full chunk chunk [hec].	A software error occurred.	-	"Copy the error message exactly as it appears and report it to your "technical support representative."
SYS2CHUNKPARTIAL	2-Critical	Attempted to destroy partially full chunk chunk 0x[hec] chunk name: \[chars]\.	A software error occurred.	-	"Copy the error message exactly as it appears and report it to your "technical support representative."
SYS2CHUNKSIBLINGDEST	2-Critical	Attempted to destroy a sibling chunk [hec] [chars].	-	-	-
SYS2CHUNKSIBLINGS	2-Critical	Attempted to destroy chunk with siblings chunk [hec].	A software error occurred.	-	"Copy the error message exactly as it appears and report it to your "technical support representative."

Family-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Remarks/Action
SYS2CONG_DOWNFAL	2-Critical	Generated configuration not backward compatible	The router has been configured to generate nonvolatile memory using the commands of an older software version. The current configuration of the router contains a command that cannot be saved using only the older command set.	none	"Allow the router to save the configuration using the command set of " "the current software version or remove the commands that cannot be " "saved using the older command set."
SYS2-CZIP_ERROR	2-Critical	Error: [chars]	A software Error occurred while decompressing the Image. The actual error is within the string of the error message.	os	LOGS_IDACION
SYS2EXCEPTIONDUMP	2-Critical	System Crashed Writing Core....	The system has crashed because of an exception A core is being generated	-	LOGS_IDACION
SYS2-EXMEMFREE	2-Critical	Free a non allocated ptr [hec] size [dec].	Trying to free a memory which not all of it marked as allocated.	-	"Copy the error message exactly as it appears and report it to your " "technical support representative."
SYS2-EXMEMINIT	2-Critical	EXMEM [dec]: [chars]	The requested external memory allocator failed to be initialized. reasons are not clear.	-	"Copy the error message exactly as it appears and report it to your " "technical support representative."

Family-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Remarks
SYS2-EXMEMPARAM	2-Critical	Bad parameter [dec] when calling to the allocator utility	Illegal parameter is used when called to allocator. may represent data some corruption.	-	"Copy the error message exactly as it appears and report it to your "technical support representative."
SYS-2-FREEBAD	2-Critical	Attempted to free memory at [hec] not part of buffer pool	An attempt was made to free memory but the request could not be completed due to an invalid memory data structure	-	-
SYS-2-FREEFREE	2-Critical	Attempted to free unassigned memory at %lx alloc %lx dealloc %lx	An attempt was made to free memory at the indicated location. The memory could not be freed because it was not allocated.	-	-

Family-Severity-Meaning	Severity-Meaning	Message	Message-Explanation	Component	Remarks
SYS-2-GETBUF	2-Critical	Bad getbuffer bytes= [dec]	The software requested a buffer that is larger than the largest configured buffer size or it requested a negative-sized buffer.	Determine the component from the stack trace and process name displayed in the error message. \n\nUse Topic to search for a similar DDTS. If you find none submit a DDTS for this problem. If the stack trace indicates that the buffer code was called from an interrupt handler use the interrupt handler to determine the DDTS component. Otherwise use the process name to determine the DDTS component.	-
SYS2-GETBUFFAIL	2-Critical	[chars] buffer allocation [dec] bytes failed from [hex]	-	-	-

Family-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Remarks
SYS-2-IMMORTAL	2-Critical	Attempt to shut down management process [dec] [chars].	An attempt was made to shut down the specified management process. Management processes must not be shut down as long as the router remains up.	Determine the component from the stack trace displayed in the error message. Use Topic to search for a similar DDTS. If you find none submit a DDTS for this problem. Choose the DDTS component associated with the routine that called the process_kill.	-

Family-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Remarks
SYS-2-IMMORTAL	2-Critical	Attempt to shut down management process [dec] [chars].	An attempt was made to shut down the specified management process. Management processes must not be shut down as long as the\n router remains up.	Determine the component from the stack trace displayed in the error message. Use Topic to search for a similar DDTS. If you find none submit a DDTS for this problem. Choose the DDTS component associated with the routine that called the process_kill.	-
SYS-2-INLIST	2-Critical	Buffer in list ptr= [hec]	An internal software error occurred.	-	"If this messages recurs copy it exactly as it appears and report " "it to your technical support representative."
SYS-2-INLIST1	2-Critical	Buffer in list ptr= [hec] caller= [hec]	An internal software error occurred.	-	"If this messages recurs copy it exactly as it appears and report " "it to your technical support representative."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Remarks
SYS2-INPUT_GETBUF	2-Critical	Bad getbuffer bytes= [dec] for interface= [chars]	The software requested a buffer that is larger than the largest configured buffer size or it requested a negative-sized buffer.	Determine the component from the stack trace and process name displayed in the error message. \n\nUse Topic to search for a similar DDTS. If you find none submit a DDTS for this problem. If the stack trace indicates that the buffer code was called from an interrupt handler use the interrupt handler to determine the DDTS component. Otherwise use the process name to determine the DDTS component.	LOGSIDACION
SYS-2-INPUTQ	2-Critical	INPUTQ set but no IDB ptr=[hec]	This message is issued when an attempt is made to alter the input queue count for a packet that should not be counted.	-	-

Fault-Severity-Meaning	Severity-Meaning	Message	Message-Explanation	Component	Remarks
SYS-2-INSCHED	2-Critical	[chars] within scheduler	-	Determine the component from the stack trace displayed in the error message. Then use Topic to search for a similar DDTS. If you find none submit a DDTS for this problem.	-

Family-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Remarks
SYS-2-INTSCHED	2-Critical	'[chars]' at level [dec] [chars]	The scheduler was entered from an interrupt service routine ISR.	Determine the component from the stack trace and process name displayed in the error message. Then use Topic to search for a similar DDTS. If you find none submit a DDTS for this problem. If the stack trace indicates that the scheduler was called from an interrupt handler choose the DDTS component based on the interrupt handler. Otherwise use the process name to determine the DDTS component.	-

Priority-Severity-Meaning	Severity-Meaning	Message	Message-Explanation	Component	Remarks
SYS-2-INTSCHED	2-Critical	'[chars]' at level [dec]	The scheduler was entered from an interrupt service routine ISR.	Determine the component from the stack trace and process name displayed in the error message. Then use Topic to search for a similar DDTS. If you find none submit a DDTS for this problem. If the stack trace indicates that the scheduler was called from an interrupt handler choose the DDTS component based on the interrupt handler. Otherwise use the process name to determine the DDTS component.	-

Facility-Security-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Remarks-Action
SYSNAIDFEAURENEX	2-Critical	Feature index [dec] is not within the defined feature array boundary.	An inconsistency was detected while looking up for feature index. It is software error because of wrong enumeration of feature index.	none	"Copy the error message exactly as it appears on the console " "or in the system log contact your Cisco technical support representative " "and provide the representative with the gathered information. " "Save any crashinfo or crashdump files. If the router has crashed and " "was not configured to automatically reload the router will " "need to be reloaded manually."
SYSNAIDFEAURENEX	2-Critical	-	-	-	-
SYS2LINEPROCDEAD	2-Critical	Killing process [chars] associated with line [dec]	A process associated with a tty line was killed by another process. The line may go dead	exec	"If this messages recurs copy it exactly as it appears " "and report it to your technical support representative."

Priority-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Remarks
SYS-2-LINKED	2-Critical	Bad [chars] of [hec] in queue [hec]	An internal software error occurred.	Determine the component from the stack trace and process name displayed in the error message. Use Topic to search for a similar DDTS. If you find none write a DDTS for this problem. If the stack trace indicates that the buffer code was called from an interrupt handler use the interrupt handler to determine the DDTS component. Otherwise use the process name to determine the DDTS component.	"If this message recurs copy it exactly as it appears and report "it to your technical support representative."

Family-Severity-Metric	Severity-Meaning	Message	Message-Explanation	Component	Remarks
SYS-2-LOWMEMIO	2-Critical	Low-memory debug exception limit=[dec] free=[dec]	The router is configured to crash when total available IO memory drops below a specified threshold. That threshold has been reached. This may have occurred due to a memory leak or from supporting additional features.	mem	"If you suspect a memory leak " "copy the message exactly as it appears and " "report it to your technical support representative. " "Otherwise you may need to add memory " "or reduce the number of features you are trying to " "support."
SYS2LOWMEMPROC	2-Critical	Low-memory debug exception limit=[dec] free=[dec]	The router is configured to crash when total available processor memory drops below a specified threshold. That threshold has been reached. This may have occurred due to a memory leak or from supporting additional features.	mem	"If you suspect a memory leak copy the message exactly as it appears and " "report it to your technical support representative. Otherwise you may " "need to add memory or reduce the number of features you are trying to " "support."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Remediation
SYS-2-MADVISEFAIL	2-Critical	Madvise failed memory at [hex].	An attempt was made to create secure mempool but it failed.	os	"This is a notification message only. No action is required."
SYS-2-MALLOCFAIL	2-Critical	Memory allocation of [dec] bytes failed from [hex] alignment [dec] \n Pool: [chars] Free: [dec] Cause: [chars] \nAlternate Pool: [chars] Free: [dec] Cause: [chars] \n	The requested memory allocation is not available from the specified memory pool. The current system configuration network environment or possibly a software error may have exhausted or fragmented the router's memory.	mem-suspect	"If you suspect a software error copy the error message exactly as it " "appears on the console or in the system log contact your technical support" "representative and provide the representative with the gathered information. " "Otherwise you may need to add more memory or reduce the number of " "features you are trying to support."

Family-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Remarks-Action
SYS-2-MALLOCFAIL	2-Critical	Memory allocation of [dec] bytes failed from [hex] alignment [dec] \n Pool: [chars] Free: [dec] Cause: [chars] \nAlternate Pool: [chars] Free: [dec] Cause: [chars] \n	The requested memory allocation is not available from the specified memory pool. The current system configuration network environment or possibly a software error may have exhausted or fragmented the router's memory.	mem-suspect	"If you suspect a software error copy the error message exactly as it " "appears on the colsole or in the system log contact your technical support" "representative and provide the representative with the gathered information. " "Otherwise you may need to add more memory or reduce the number of " "features you are trying to support."
SYS-2-BMEXCEED	2-Critical	BM bit allocation limit exceeded	The BM has exhausted all of the bits available for allocation	idb	"Copy the error message exactly as it appears and report it to" " your technical support representative."
SYS-2-MMAP	2-Critical	mmap failed for size [dec] bytes Caller PC 0x[hec] errno [dec]	Failed to allocate memory for the requested size. The memory could not be mapped because there is no memory.	-	-

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Remarks/Action
SYS-2-MUNMAP	2-Critical	Could not return memory Neutrino via munmap at %lx size [dec] errno [dec]	Failed to unmap memory at the indicated location. The memory could not be unmapped because it was allocated via mmap.	-	-
SYS-2-MUTEXLOCKFAIL	2-Critical	pthread_mutex_lock failed for [chars]	The thread failed in pthread_mutex_lock while trying to acquire a mutex.	mem-suspect	"Copy the error message exactly as it appears and report it to your "technical support representative."
SYS-2-NOBLOCK	2-Critical	[chars] with blocking disabled.	A process attempted to relinquish control with blocking disabled.	Determine the component from the stack trace displayed in the error message. Use Topic to search for a similar DDTS. If you find none submit a DDTS for this problem. Choose the DDTS component associated with the routine that called the scheduler.	-

Family-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Remarks
SYS-2-NOBLOCK	2-Critical	[chars] with blocking disabled.	A process attempted to relinquish control with blocking disabled.	Determine the component from the stack trace displayed in the error message. Use Topic to search for a similar DDTS. If you find none submit a DDTS for this problem. Choose the DDTS component associated with the routine that called the scheduler.	-
SYS2-NOMEMFRGIO	2-Critical	Memory fragmentation check debug exception fragment size [dec]	The router is configured to crash when the largest available contiguous IO memory block drops below a specified threshold. That threshold has been reached. This may have occurred due to excessive memory thrashing or from supporting additional features.	mem	"If you suspect memory thrashing " "copy the message exactly as it appears " "and report it to your technical support representative. Otherwise " "you may need to add memory or reduce the number of features you are " "trying to support."

Family-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Remediation
SYS2-NOMEMRPROC	2-Critical	Memory fragmentation check debug exception fragment size [dec]	The router is configured to crash when the largest available contiguous processor memory block drops below a specified threshold. That threshold has been reached. This may have occurred due to excessive memory thrashing or from supporting additional features.	mem	"If you suspect memory thrashing copy the message exactly as it appears " "and report it to your technical support representative. Otherwise " "you may need to add memory or reduce the number of features you are " "trying to support."
SYS-2-NOMEMORY	2-Critical	No memory available for [chars] [dec]	An operation could not be accomplished because of a low-memory condition. The current system configuration network environment or possibly a software error might have exhausted or fragmented the router's memory.	mem-suspect	"Reduce other system activity to ease memory demands. If conditions " "warrant upgrade to a configuration that has more memory."
SYS-2-NOPROCESS	2-Critical	No such process [dec]	An internal software error occurred.	-	"If this messages recurs copy it exactly as it appears and report " "it to your technical support representative."

Family-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Remarks
SYS-2-NOTDEAD	2-Critical	Killing process [chars] pid [dec] again	An internal software error occurred.	os-scheduler	"If this messages recurs copy it exactly as it appears and report "it to your technical support representative."
SYS-2-NOTIOSTASK	2-Critical	[chars] from outside IOS task context	An IOS reschedule request was made from code that is not running in the context of an IOS task -- from an interrupt handler the scheduler itself or a service pthread within the IOS process.	Determine the component from the stack trace displayed in the error message. Use Topic to search for a similar DDTS. If you find none write a DDTS for this problem.	"Copy the error message exactly as it appears and report it to your "technical support representative."

Family-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Remarks
SYS-2-NOTQ	2-Critical	[chars] didn't find [hec] in queue [hec]	An internal software error occurred.	Determine the component from the stack trace and process name displayed in the error message. Use Topic to search for a similar DDTS. If you find none write a DDTS for this problem. If the stack trace indicates that the buffer code was called from an interrupt handler use the interrupt handler to determine the DDTS component. Otherwise use the process name to determine the DDTS component.	"If this message recurs copy it exactly as it appears and report "it to your technical support representative."

SSCONF_NVD_OBRUN	4-Warning	Non config data present at the end of nvram needs to be overwritten to fit the configuration into nvram	The software detected that the non config data files occupying the end of nvram need to be overwritten to fit the configuration. Typically these files are used by snmp to store and retrieve non config persistent data across system reload.	-	"Compress the configuration and store or copy to flash as appropriate"
SSCONF_NVD_OBRUN	4-Warning	Non config data present at the end of nvram needs to be overwritten to fit the configuration into nvram	The software detected that the non config data files occupying the end of nvram need to be overwritten to fit the configuration. Typically these files are used by snmp to store and retrieve non config persistent data across system reload.	-	"Compress the configuration and store or copy to flash as appropriate"
SSCONF_NVD_TRUNC	4-Warning	Configuration needs to be truncated to fit into nvram	The software detected that the configuration is to be truncated to fit in the nvram. There was not enough space to save the compressed configuration	-	"Save the configuration to flash if the platform supports \"boot config nvbypass\" command."
SSCONF_NVD_OBRUN	4-Warning	Non config data present at the end of nvram is corrupted	The software detected that the configuration saved into nvram has overlaid a part of the nvram occupied by non config data files. Typically these files are used by snmp to store and retrieve non config persistent data across system reload.	-	"Compress the configuration and store or copy to flash as appropriate"

Family-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Remediation
SYSKONFIG_NVRAMCORRUPT	4-Warning	Non config data present at the end of nvram is corrupted	The software detected that the configuration saved into nvram has overlaid a part of the nvram occupied by non config data files. Typically these files are used by snmp to store and retrieve non config persistent data across system reload.	-	"Compress the configuration and store or copy to flash as appropriate"
SYSKONFIG_NVRAMTRUNCATED	4-Warning	Truncated configuration to %ld bytes from %ld bytes	The software detected that the configuration saved into nvram has been truncated. There was not enough space to save the compressed configuration.	-	"Save the configuration to flash if the platform supports " " \boot config\" command."
SYSKONFIG_REMOTE_LOAD_FAILURE	4-Warning	System config parse from [chars] failed	The configuration file from the URL specified in the error message could not be read.	-	"Enter the <Cmd> no service <Ctrl> <Ctrl> "command to disable autoloading of configuration files " "OR investigate why the tftp load is failing."
SYS4CPURESRISING	4-Warning	[chars][chars] is seeing [chars] cpu util [dec]%% at [chars] level more than the configured [chars] limit [dec] %%	The system is experiencing high CPU usage possibly from a process that is using too much CPU. This condition demands immediate attention or packets or calls may be dropped. CPURESRISE notifications should be matched with the corresponding CPURESRISE notification.	-	"No action is required"

Family-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Remarks-Action
SYS4DUAL_MESSAGE	4-Warning	SNMP system message request [dec] denied because of pending job	A software error occurred.	-	"Copy the error message exactly as it appears and report it to your " "technical support representative."
SYS4EXMALLOCFAIL	4-Warning	External memory allocation of [dec] bytes failed from EXMEM [dec]	The requested memory allocation is not available from the specified memory pool. The current system configuration network environment or possibly a software error might have exhausted or fragmented the router's memory.	-	"Copy the error message exactly as it appears and report it to your " "technical support representative."
SYS4FREEMEMLOW	4-Warning	Top Allocator Name: [chars] PC: [chars] Size: [dec] Count: [dec] Largest block: %-9lu	The memory pool specified in the error message is experiencing a low-memory condition. The amount of free memory available in the specified memory pool has dropped below the configured low-memory limit.	-	"No action is required"
SYS4FREEMEMLOW	4-Warning	Free Memory has dropped below low watermark\nPool: [chars] Free: %lu Threshold: %lu\n	The memory pool specified in the error message is experiencing a low-memory condition. The amount of free memory available in the specified memory pool has dropped below the configured low-memory limit.	-	"No action is required"

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Remediation
SYSDATAUNRELIABLE	4-Warning	Update to memory leak detector on free of 0x[hec] failed CLI output is unreliable\n	managed chunk malloc to store the range that is freed while memory leak detector is in progress failed. Hence memory leak detector will not be updated of this free and this can be reported as leak which is false.	mem	"Ignore the output of \"show memory debug leaks..\" if system is in low \"memory condition else perform a bug toolkit search on the web for \"existing bugs related to this error message if none found contact TAC \"for this problem providing \"show version\" and \"show memory statistics\" output."
SYSGLOBALBUFEXCEED	4-Warning	Buffer usage has gone above global buffer [chars] threshold \nconfigured [dec] Current usage :[dec]\n	global buffer usage has gone above the configured limit. This violation can happen because of all the entities which use buffers in the system. GLOBALBUFEXCEED notifications should be matched with the corresponding GLOBALBUFEXCEED notification.	rmi	"No action is required"

Family-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Remarks
SYS4GREEDY_REGEX	4-Warning	[chars] while processing the input regular expression. Aborting processing use alternate regular expression. Input regular expression: \[chars]\	Regular expression processing limitation: Certain regular expressions require huge stack space for processing or can lead to processing timeouts. We abort processing such regular expressions and print this message to avoid stack overflow/unexpected reload.	os	"The regular expression specified leads to stack overflow/processing " "timeout of the indicated process. Recommended to use a different " "regular expression."
SYS4INVALID_IMAGE	4-Warning	Running invalid image for platform!	The software image being run is for a different hardware architecture. This problem can occur on a Cisco 1003 Cisco 1004 or Cisco 1005. The Cisco 1003 and Cisco 1004 use a different image from the Cisco 1005.	none	"Install the correct software image."
SYS4LOG_PERSISTENT	4-Warning	Logging persistent command exceeded its size. Oldest logging-persistent file was deleted file name: [chars].	The Common Criteria CC certification requires a log message to indicate when logging persistent command exceeded the specified size limit and the old messages were overwritten.	os-logging	"This message is for information however the " "user may consider to increase logging-persistent size or to " "delete old logging persistent files."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Remediation
LOGGING_THRESHOLD	4-Warning	Logging persistent exceeded the threshold value and its space is full. The threshold capacity was changed to the default value. Oldest logging-persistent files will be deleted.	This log message to indicate when logging persistent command exceeded the specified size limitthreshold value and the old messages were overwritten.	syslog	"This message is for information however the " "user may consider to increase logging-persistent size or to " "delete old logging persistent files."
SYS4NV_BLOCK_NIFAIL	4-Warning	Unable to initialize the geometry of nvram	The software detected that it failed to initialize the nvram block geometry a part of the nvram to host non config data files. Typically these files are used by snmp to store and retrieve non config persistent data across system reload. This may happen when the entire nvram is packed with the configuration and the newer version of software which supports this feature could not find the minimum room in the nvram to initialize block file system.	-	"Reduce the configurations in the nvram atleast by 2K"
SYS4NV_CHKSUM	4-Warning	An nvram checksum is already in progress	An interrupt service routine attempted to perform a checksum on the nvram contents and found the resource in use.	nvram	-

Family-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Remarks-Action
SYS4-NV_INVALID	4-Warning	Nvram is invalid. Attempting to read and apply '[chars]' anyway	Nvram is corrupted. But still try to read startup-config as this was the behavior in 12.3T for platforms like c1700.	nvram	"Verify whether the box was powercycled or crash " "was triggered prior to this message. Issue 'show tech' command"
SYS4-NV_NOLOCK	4-Warning	Failed to acquire an nvram lock	An interrupt service routine's attempt to acquire a semaphore lock failed	-	"Copy the error message exactly as it appears and report it to your " "technical support representative."
SYS4-UPDATECLOCK	4-Warning	Periodic Clock update with ROMMON failed because size left in ROMMON %lu size needed %lu error code %ld	This message indicates that the periodic update of the clock to ROMMON failed. This would indicate that the router when restarted may have past clock values	os	"Drop to rommon and clear unwanted rommon variable entries"
SYS-4-REGEXP	4-Warning	[chars].	An internal software error occurred.	-	"If this messages recurs copy it exactly as it appears and report " "it to your technical support representative."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Remarks
SYS4RELOAD_ATTEMPT	4-Warning	Attempt via SNMP failed system shutdown not configured	SNMP cannot be used to reload the router unless this functionality has been previously configured. This message reports that an attempt to reload the router failed because SNMP reloads are not currently configured on the router.	none	"This is a notification message only. No action is required."
SYS4RESBUFEXCEED	4-Warning	Resource user[chars] [chars] has exceeded the buffer [chars] threshold. configured [dec] Current usage :[dec]\n	The Resource User specified in the error message has violated the configured threshold. Its buffer usage has gone above the threshold. RESBUFEXCEED notifications should be matched with the corresponding RESRRCOMR/RESBUFUNAPPLY notification.	rmi	"No action is required"
SYS4RESGLOBALBUFEXCEED	4-Warning	Buffer usage has gone above buffer [chars] threshold configured by resource user[chars] [chars]\n configured [dec] Current usage :[dec]\n	The global buffer usage has gone above the threshold of the RU specified in the error message. RESGLOBALBUFEXCEED notifications should be matched with the corresponding RESGLOBALBUFRECOVER/RESGLOBALBUFUNAPPLY notification.	rmi	"No action is required"
SYS4RESGLOBALBUFRCOMR	4-Warning	Buffer usage has gone below buffer [chars] threshold configured by resource user[chars] [chars]\n configured [dec] Current usage :[dec]\n	The global buffer usage has gone below the threshold of the RU specified in the error message.	rmi	"No action is required"

Family-Severity-Metric	Severity-Meaning	Message	Message-Explanation	Component	Remarks
RESGLOBALBUF	4-Warning	Global Buffer usage for resource user[chars] [chars] is no longer monitored for [chars] threshold.\n	The global buffer usage configured by the Resource User specified in the error message is no longer monitored for the specified threshold. The corresponding policy is revoked	rmi	"No action is required"
RESGLOBALMEMEXCEED	4-Warning	Global Memory has exceeded the [chars] threshold configure by resource user [chars]\n Pool: [chars] Used: %lu Threshold: %lu\n	The memory pool specified in the error message is experiencing a low-memory condition. The amount of free memory available in the specified memory pool has dropped below the configured low-memory limit. RESGLOBALMEMEXCEED notifications should be matched with the corresponding RESGLOBALMEMEXCEED notification.	rmi	"No action is required"

VINES2-BADTIMER	2-Critical	RTP timer for [chars] was found disabled and was reset	An internal interface timer is not running. This condition usually\n\ occurs after an interface is reset.	vines	"No action is required. The system automatically restarts the timer."

Family-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Remarks
VINES2CACHEFAILED	2-Critical	Cannot build cache entry [dec] bytes for [v-name] on [chars]	VINES fast switching detected that the packet destined to a given\n\n address did not have proper encapsulation information or its\n\n encapsulation size was too large to fit into the cache.	vines	"Verify that the VINES encapsulation and interface-specific mappings\n\n for the interface concerned are properly configured. Copy the \n\n message exactly as it appears and report it your technical\n\n support representative."

Family-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Remarks
VINES2CACHEUNSUP	2-Critical	Caching of [chars] not supported on [chars]	The cache population routing for VINES fast switching was called for\n\n an interface that does not support VINES fast switching.	vines	"Copy the message exactly as it appears and report it your technical\n\n support representative. If other encapsulation types are available\n\n on the interface try using them. If this problem is not limited to \n\n one or two destinations but rather occurs with all traffic\n\n using the interface disable VINES fast switching for the\n\n interface until you have identified the real cause of the problem."

Fault-Symptom	Severity-Meaning	Message	Message-Explanation	Component	Remarks
VINES2CONSSIENCY	2-Critical	Error [chars]	<p>The VINES code ran into a situation that should not happen. For example an IPC port number needs to be allocated but all 65535 port numbers are currently in use. Another possible cause is that VINES attempted to add a cache entry but had no path associated with the destination address. This may cause temporary slow performance to only those stations that have experienced this inconsistency until complete cache entries are added. However connectivity should not be lost because all data traffic can still be routed via process-level switching.</p>	vines	

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Remarks
					<p>"Copy the message exactly as it appears and report it your technical support representative. If the warning message is about IPC port number depletion use the show vines ipc command to check how many IPC ports are currently in use by which services and determine whether the IPC connections are all legitimate. To release IPC ports issue the clear vines ipc command. If the warning message is about vines cache entries provide the contents of the vines route cache neighbor</p>

Error-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Recommendation
					<p>and route tables immediately after the error messages \n\ appeared. If the problem persists issue the clear vines\n\ cache command and monitor the router if the situation improves."</p>

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Remarks
VINES2CORRUPTENIRY	2-Critical	Detected a corrupted entry in the [chars] table	The VINES code detected that an internal table entry was corrupted.	vines	"Copy the message exactly as it appears and report it your technical support representative. If possible clear the VINES routing table or neighbor table depending on the table in which the corrupted entry was observed. This will result in a temporary loss of connectivity until the routing or neighbor table is rebuilt."

Family-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Remarks
VINES-2-DUPADDR	2-Critical	Duplicate address detected on interface [chars]	The router detected that its VINES address is being used by another\r\n\ router.	vines	

Priority-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Remediation
					<p>"To identify the other router that is using this address manually\n\n inspect each router's configuration. When you have identified\n\n the router with the duplicate address issue the vines routing\n\n recompute command on both routers or issue the enable vines routing \n\n command specifying specify a unique address. If one of the routers \n\n does not support the recompute keyword disable VINES on that router \n\n issue the write terminal command to save the configuration to memory \n\n reboot the router</p>

Error-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Remarks
					and then enter the vines routing command with\n a unique vines address on the offending routers until each router has\n a unique address."

Facility Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Remarks Action
VINES2ENCAFFAILED	2-Critical	Encapsulation failed for [v-name] via [v-name] on [chars]	VINES fast switching encountered an encapsulation failure\n\n when building a cache entry for a neighbor.	vines	

Error-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Remarks
					<p>"Examine your configuration for causes of the encapsulation failure.\n\n Look for missing map statements interfaces that have gone down and so\n\n on. If this error results in lost connectivity disable vines fast\n\n switching by issuing the no vines route-cache command. Because\n\n disabling fast switching will slow network performance you should\n\n issue the vines route-cache command to re-enable fast switching\n\n as soon as you have identified the cause of the problem. If you\n\n cannot identify the cause</p>

Priority-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Remarks
					<p>contact your technical support representative. Provide the output of the show vines cache show vines neighbor and show vines route commands for the destination address and neighboring routers you are using. Also provide the output of the show interface and show vines interface commands for the incoming and outgoing interfaces."</p>

Family-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Remarks-Action
VINES2-INVALIDPATH	2-Critical	Bad [chars] in path for neighbor entry %z	While searching the neighbor table the code determined that a pointer\n\ that should point to a VINES path structure actually points to some\n\ other structure.	vines	"Copy the message exactly as it appears and report it your technical\n\ support representative. If possible clear the VINES\n\ neighbor table. This will result in a temporary loss of connectivity\n\ until all neighbors and routes are relearned."
VINES2-INVALIDROUTE	2-Critical	Bad [chars] in route for server entry %Z	While searching the routing table the code determined that a pointer\n\ that should point to a VINES route structure actually points to some\n\ other structure.	vines	"Copy the message exactly as it appears and report it your technical\n\ support representative. If possible clear the VINES\n\ routing table. This will result in a temporary loss of connectivity\n\ until all routes are relearned."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Remediation
VINES2-NOBUFFERS	2-Critical	No buffers available for [chars]	There were no buffers available to send a VINES service query\n\n or reply.	vines	"Examine your system's memory and buffer capacity and compare\n\n it with current usage. If you notice a substantial discrepancy\n\n monitor your system for possible memory leaks or buffer drainage\n\n and report the problem to your technical support representative\n\n along with the output of the show memory show memory processor\n\n show buffers show buffers assigned and show buffers old commands."

Family-Severity-Metric	Severity-Meaning	Message	Message-Explanation	Component	Remarks
VINES2-NOVENCAP	2-Critical	Encapsulation failed on [chars] for address [v-name]	The VINES code tried to send a packet on an interface that does not have a new encapsulation routine for outbound packets.	vines	"Toggle the problematic interface by issuing the interface shut and no shut commands and then issue the no vines metric and vines metric command see if the problem goes away. If the problem persists copy the message exactly as it appears and report it your technical support representative. If possible turn on and provide interface-specific debug traces particularly for VINES activities."

Fault-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Remarks
VINES6FNNOIFOUND	6-Information	[chars] service [chars] routine missing [chars] vector	There is an inconsistency in the static VINES data structures for\n\ handling application-layer packets.	vines	"Turn on VINES service level debugging for the service reported\n\ in the error message and copy the debug traces and the error\n\ message exactly as they appear and report them to your technical\n\ support representative."

Family-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Remarks
VINES6PCNOROUTINE	6-Information	IPC port [dec] registered without an upcall [chars]	There is an inconsistency in the active VINES data structure for\n\n handling IPC data messages. A message was received for a port that\n\n should have a listener but the listener routine cannot be found.	vines	"Examine the IPC ports currently supported on the router\n\n by issuing the show vines ipc command and see whether the reported\n\n IPC port is indeed not active. Copy the message exactly as it\n\n appears and report it to your technical support representative\n\n along with the output of the debug vines ipc command."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Remarks
VINES6RPCNOSERVICE	6-Information	IPC port [dec] registered without a service	There is an inconsistency in the active VINES data structure for\n\n handling Net RPC messages. A message was received for a port that\n\n should have a service description but that service description cannot\n\n be found.	vines	"Enter the show vines ipc command and see whether the reported IPC\n\n port has a registered service. Copy the message exactly as it\n\n appears and report it to your technical support representative\n\n if possible along with output of the debug vines netrpc command."

Family-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Remarks
VINES6-RINNOIFOUND	6-Information	[chars] service [chars] routine not found while [chars]	There is an inconsistency in the active VINES service description data\n\ structures. A service handler routine cannot find the description of\n\ its own service.	vines	"Copy the message exactly as it appears and report it your technical\n\ support representative. In addition provide the output of the show\n\ vines service command and debug vines service traces for the\n\ service reported in the error message."
VIPMLP-2-NOVBLEAVE	2-Critical	[chars] Interleave not configured due \n\ to Insufficient memory	Interleave not configured due to Insufficient memory.	-	"Copy the error message exactly as it appears and report it to your\n\ technical support representative."
VIPMLP-2-NOVC	2-Critical	[chars]: packet received for non-existent VC [dec]	Virtual channel encapsulation is corrupted.	-	"Copy the error message exactly as it appears and report it to your\n\ technical support representative."

VPN_HW-1-NOMEMORY	1-Alert	[chars] creation failed for slot [dec]	The VPN_HW driver in its initialization phase could not allocate memory for the data structure that is specified in the error message.	vpn_hw	"Reduce other system activity to ease memory demands. If conditions "warrant upgrade to a larger memory configuration. If this "message recurs copy the error message exactly as it appears on the console "or in the system log contact your Cisco technical support "representative and provide the representative with the gathered information."
VPN_HW-1-OWNER	1-Alert	slot: [dec]: [chars] packet buffer pak=0x%08x	A software or hardware error occurred. The VPN hardware accelerator driver has detected that the buffer ring is in an inconsistent and unrecoverable state.	vpn_hw	LOGSIDACION

Family-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Remarks
VPN_HW-1-PACKET_ERROR	1-Alert	slot: [dec] Packet Encryption/Decryption error [chars]	An unexpected error occurred during the encryption or decryption of a packet.	-	"This message can occur occasionally during normal operation of the " "system. It may occur during the transition to a new session key for " "a Security Association. In such cases no action is required. However " "if it happens frequently or is associated with traffic disruption then " "note of the status value and contact a Cisco representative. The " "VPN hardware accelerator will most likely need to be replaced."
VPN_HW-1-TOOBIG	1-Alert	Slot: [dec] - [chars] received a packet with size [dec].	Software supports upto **** MTU	vpn_hw	LOGSID_AIDN

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Remediation
VPN_HW-1-UNSUPP	1-Alert	VPN Module in slot: [dec]: [chars] %08x.	This revision or version of the VPN hardware accelerator in the slot specified in the error message is not supported.	vpn_hw	"Verify the VPN hardware adapter is the proper hardware level and software " "revision for the running version of IOS. If it is " "copy the error message exactly as it appears and report it to " "your Cisco technical support representative."
VPN_HW-3-MULIDEV	3-Error	Cannot support more than one Encryption AIMs	A second Encryption AIM was discovered present in the system. The\n\nEncryption AIM software only supports a single Encryption AIM. All\n\nother Encryption AIMs installed will be ignored.	-	"Remove one of the Encryption AIMs installed in your system."
VPN_HW-6-FIPSEFAIL	6-Information	FIPS test_id [dec][chars] Test Failure will be induced	The FIPS test was forced to fail from ROMMON	-	"Do not set FIPS_FAIL via rommon if fips failure test is not desired"
VPN_HW-6-INFO	6-Information	slot: [dec] [chars]	This is informational message from VPN hardware accelerator driver.	vpn_hw	"This is informational message from VPN_HW. This occurs " "in normal operation. No action is required."

Family-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Remarks-Action
VPN_HW-6-INFO_LOC	6-Information	Crypto engine: [chars] [chars]	This is informational message from VPN hardware accelerator driver.	vpn_hw	"This is informational message from VPN_HW. This occurs " "in normal operation. No action is required."
VPN_HW-6-SHUTDOWN	6-Information	[chars] shutting down	The specified VPN_HW is shutting down. It may have been physically removed.	vpn_hw	"This is an informational message only. It occurs " "in normal operation."
VQCLIENT-2-CHUNKFAIL	2-Critical	Could not allocate memory for VQP	An error occurred when the system tried to allocate memory for the VQP client.	dynamic_vlan	LOGSIDACTION
VQCLIENT-2-DENY	2-Critical	Host [enet] denied on interface [chars]	The VMPS has denied access for the given host MAC address to the specified interface.	dynamic_vlan	"No action is normally required. If you feel that " "the host should have been allowed access then the " "configuration on the VMPS should be checked."
VQCLIENT-2-INITFAIL	2-Critical	Platform-specific VQP initialization failed. Quitting	An error occurred during initialization of the VQPC platform-specific code.	dynamic_vlan	LOGSIDACTION
VQCLIENT-2-IPSOCK	2-Critical	Could not obtain IP socket	An error occurred when the system attempted to open an IP socket to the VMPS.	dynamic_vlan	LOGSIDACTION

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Remediation
VQPCIENT2-PROCFAL	2-Critical	Could not create process for VQP. Quitting	An error occurred while creating a process for the VQP client.	dynamic_vlan	LOGS_IDACTION
VQPCIENT2-SHUTDOWN	2-Critical	Interface [chars] shutdown by VMPS	The VMPS has directed that the specified interface be shut down.	dynamic_vlan	"No action is normally required. If you feel that " "the port should not have been shut down then the " "configuration on the VMPS should be checked."
VQPCIENT2-TOOMANY	2-Critical	Interface [chars] shutdown by active host limit	The system has shut down the specified interface because too many hosts have requested access to that port.	dynamic_vlan	"To reactivate the port remove the excess hosts " "and issue a no shut command to the interface."
VQPCIENT3-IFNAME	3-Error	Invalid interface [chars] in response	The VMPS has sent an unsolicited response with an unknown interface name	dynamic_vlan	"Check the VMPS configuration."
VQPCIENT3-THROTFLE	3-Error	Throttling VLAN change on [chars]	An attempt was made to change the vlan assignment for the specified interface more often than once every 10 seconds. The vlan change is denied.	dynamic_vlan	"No action is normally required. If the message " "recurs check the VMPS configuration. Verify " "that unexpected hosts are not connected to " "the port."

Family-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Remarks
VQCLIENT-3-VLANNAME	3-Error	Invalid VLAN [chars] in response	The VMPS has specified a vlan name that is unknown to the switch.	dynamic_vlan	"Make sure that the vlan exists on the switch. " "Check the VMPS configuration."

" "Copy the message exactly as it appears and report it to your technical " "support representative."

Family-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Remarks
XDR-3- CLIENT_ISSU_SENDAILED	3-Error	Can't send XDR client ISSU nego msg: reason [chars] slot [chars] XDR client [chars]	XDR has failed to send an ISSU negotiation message for the given client. The slot will be marked as ISSU-unaware and communication with this slot will proceed on that basis. However this is likely to lead to unpredictable behaviour.	XDRCOMPEN	"Get the output of \"show xdr multicast\" \"show xdr client all\" and " \"show issu message types [XDR client ISSU ID]\". " "Also copy the message exactly as it appears and report it to your " "technical support representative."
XDR-3- CLIENT_ISSU_STARTING_FAILED	3-Error	Can't start nego: reason [chars] slot [chars] XDR client [chars] sid [dec]	XDR has failed to start ISSU negotiation with the remote slot for the reason given. The slot will be marked as ISSU-unaware and communication with this slot will proceed on that basis. However this is likely to lead to unpredictable behaviour.	XDRCOMPEN	"Get the output of \"show xdr multicast\" \"show xdr client all\" and " \"show issu message types [XDR client ISSU ID]\". " "Also copy the message exactly as it appears and report it to your " "technical support representative."
XDR-3- DATA_TOO_LARGE	3-Error	Data length [dec] exceeds limit of [dec] bytes	An attempt was made by a client to send XDR data that was over the given length limit which caused the send to fail.	XDRCOMPEN	LOGSIDACION

Family-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Remarks
XDR-3- FRAGMENT_NOT_ALLOWED	3-Error	Received an XDR fragment from client [chars] slot [chars] which is not allowed to send fragments	Certain clients are restricted by XDR from fragmenting their data yet such a fragment was received received.	XDRCOMPEN	LOGSIDACION
XDR-3- ILLEGAL_CAP_TYPE	3-Error	Illegal ISSU capability type [dec] for XDR client [chars]	Capability type requested is invalid. The named XDR client may not function as expected.	XDRCOMPEN	"Copy the message exactly as it appears and report it to your technical " "support representative."
XDR-3- ILLEGAL_CAP_VERSION	3-Error	ISSU capabilities for peers running same IOS version must be supported.	Basic assumption is that all peers running the same IOS version as the active RP will support the same ISSU capabilities as the active RP. This is an attempt to mark one such peer as not supporting all capabilities. This will break assumptions in XDR ISSU code and cannot be allowed. The traceback will indicate the offending XDR client.	XDRCOMPEN	"Copy the message exactly as it appears and report it to your technical " "support representative."
XDR-3- ISSU_ENUM_ERROR	3-Error	Enum for [chars] [chars] component is not ISSU-compliant: [chars]	The given enumeration is not ISSU-compliant for the reason given. Unpredictable behaviour will result when interoperating with different IOS versions.	XDRCOMPEN	"This requires a code fix before the image can be shipped or ISSU will be " "broken."
XDR-3- ISSU_NEGOFAIL	3-Error	ISSU negotiation failed for XDR slot [chars] reason: [chars]	ISSU negotiation failed. XDR on this and the remote slot cannot interoperate. Syncing of information to/from this slot for all XDR clients will not be allowed.	XDRCOMPEN	"Copy the message exactly as it appears and report it to your technical " "support representative."

Family-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Remarks
XDR-3- ISSUBADREGPARAMS	3-Error	XDR client [chars] trying to register with incomplete ISSU support.	This client does not properly support ISSU and will be registered as not supporting ISSU.	XDRCOMPEN	"We cannot allow a client to register with partial ISSU support so it will " "be registered without it. Please report this message to your technical " "support representative."
XDR-3- ISSUCAPNEGOFAIL	3-Error	XDR client [chars] failed to [chars] capability/ies due to [chars]	Internal software error - capability negotiation failed unexpectedly.	XDRCOMPEN	"Copy the message exactly as it appears and report it to your technical " "support representative"
XDR-3- ISSUINITFAIL	3-Error	Unable to register XDR ISSU [chars] reason: [chars]	Unable to register the given XDR ISSU parameter due to the reason given. This will stop ISSU working for this client and may lead to unpredictable behaviour.	XDRCOMPEN	"Copy the message exactly as it appears and report it to your technical " "support representative."
XDR-3- ISSUCAPINNO	3-Error	[chars]: [chars]	ISSU-aware XDR clients may have capabilities to negotiate. They can ask XDR to manage the state of these but must provide all relevant supporting functions to do so. In this case the given client has not done so.	XDRCOMPEN	"Copy the message exactly as it appears and report it to your technical " "support representative."

Family-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Remarks
XDR-3-MSGSIZEFAIL	3-Error	The IPC message size is out of bounds The ipc_msg_size is : [dec] while the maximum size we can handle is the XDR_IPC_BUFFER_SIZE : [dec] .	The size of the IPC message that was received is out of bounds	XDRCOMPEN	"We were not meant to get the IPC message we did. The size of the IPC " "message is larger than the maximum size that can be handled. " "This is probably due to communication incompatibility issues between the " "active and the standby RPs. " "Please report it to your technical support representative."
XDR-3-NONINCRSEQ	3-Error	Non-increasing maximum sequence [dec] was [dec] received from slot [chars]	-	-	-
XDR-3-ROCCLENISSU_NECOAL	3-Error	ISSU negotiation failed for XDR client [chars] slot [chars] reason: [chars]	ISSU negotiation failed for a core XDR client. XDR on this and the remote slot cannot interoperate in SSO mode. Syncing of information to/from this slot will not happen for any XDR client.	XDRCOMPEN	"Copy the message exactly as it appears and report it to your technical " "support representative."
XDR-3-PULLSENDFAIL	3-Error	Sending data for pull client [chars] to [chars] failed due to slots [chars] not being in group 0x[hec] of slots [chars]	-	-	-

Family-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Remediation
XDR-3- XDRIPC	3-Error	XDR IPC error on multicast-group 0x[hex] due to [chars].	A general IPC related error occurred which may prevent transfer of data to other peers using the IPC mechanism	XDRCOMPEN	"Get the output of \"show xdr multicast\" immediately after this error. \" \"Copy the message exactly as it appears and report it to your technical \" \"support representative.\""
XDR-3- XDRCASTERRING	3-Error	XDR peer [chars] bind to group [chars] was bound to [chars]: [chars]	-	-	-
XDR-3- XDRCASTINVALID	3-Error	Invalid XDR multicast group for slots [chars]: [chars]	-	-	-
XDR-3- XDRCASTJOIN	3-Error	Attempt to join [chars] to [chars] failed because client [chars] returned an error	Internal error. May result in unpredictable behaviour.	XDRCOMPEN	"Get the output of \"show xdr multicast\" \"show xdr client all\" and \" \"\"show monitor event-trace xdr all\". \" \"Copy the message exactly as it appears and report it to your technical \" \"support representative.\""

Family-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Remarks-Action
XDR-3- XDRMCASTJOINREQ	3-Error	Client [chars] returned an invalid response to a join request for groups [chars] and [chars]	Internal error. May result in unpredictable behaviour.	XDRCOMPEN	"Get the output of \"show xdr multicast\" \"show xdr client all\" and \" \"show monitor event-trace xdr all\". \"Copy the message exactly as it appears and report it to your technical \"support representative.\""
XDR-3- XDRNOMEM	3-Error	XDR failed to allocate memory during [chars] creation.	Allocation of memory by the XDR subsystem failed. This may result in an unpredictable behavior of XDR	XDRCOMPEN	"Make sure that there is enough memory for the operations being performed \"by your machine. \"Copy the message exactly as it appears and report it to your technical \"support representative.\""

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Remarks
XDR-3-XDROOS	3-Error	Received an out of sequence IPC message. Expected [dec] but got [dec] from slot [chars].	An out of sequence IPC message was received	XDRCOMPEN	"We weren't meant to get the IPC message we did. From this point onwards " "IPC can't be relied on. " "Copy the message exactly as it appears and report it to your technical " "support representative."
XDR-3-ISSU	3-Error	Cannot determine ISSU message group for slot [dec]. Unknown [chars]	Not able to determine the set of ISSU messages to be used between local and remote slot due to not being able to determine linecard type for one or other slot. This might be due to a new linecard type.	XDRCOMPEN	LOGSIDACION
XDR-3-ONINT	3-Error	Invalid operation [chars] at interrupt level by XDR client [chars]	Invalid operation at interrupt level	XDRCOMPEN	"Copy the message exactly as it appears and report it to your technical " "support representative."
XDR-3-ATTEMPT	4-Warning	Attempt to open the IPC ports failed. [chars]	XDR failed an attempt to open the IPC port to communicate to the specified peer	XDRCOMPEN	LOGSIDACION

Family-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Remarks-Action
XDR-6- CLIENTSUBADRCVIFM	6-Information	Failed to rev_transform message - from slot [chars] XDR client [chars] context [dec]	Cannot perform ISSU receive transform. This is likely due to a failure in negotiation earlier or when one side of an ISSU-enabled XDR connection is out of sync with the other.	XDRCOMPEN	"Get the output of \"show xdr multicast\" \"show xdr client all\" and \" \"show issu message types [XDR client ISSU ID]\". \" \"Copy the message exactly as it appears and report it to your technical \" \"support representative.\""
XDR-6- CLIENTSUBADIXIFM	6-Information	Failed to xmit_transform message - to slot [chars] XDR client [chars] context [dec]	Cannot perform ISSU transmit transform. This is likely due to a failure in negotiation earlier or when one side of an ISSU-enabled XDR connection is out of sync with the other.	XDRCOMPEN	"Get the output of \"show xdr multicast\" \"show xdr client all\" and \" \"show issu message types [XDR client ISSU ID]\". \" \"Copy the message exactly as it appears and report it to your technical \" \"support representative.\""

Family-Severity-Meaning	Severity-Meaning	Message	Message-Explanation	Component	Remarks
XDR-6- CLIENTISSUUNREG	6-Information	Failed to unregister session - XDR client [chars] slot [chars] reason [chars]	Unable to unregister this session. This will likely cause problems when reregistering and should be reported.	XDRCLIENT	"Get the output of \"show xdr multicast\" \"show xdr client all\" and " \"show issu message types [XDR client ISSU ID]\". " "Copy the message exactly as it appears and report it to your technical " "support representative."

Family-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Remarks
XDR-6- CLIENINOTIREGONRP	6-Information	Client [chars] has registered on slot [chars] before RP.	XDR client has registered on non-RP card before RP card. If this has occurred while toggling the client's registration status rapidly then it may be a transient problem and will resolve itself. If not then the client's status may be unpredictable and ISSU negotiation if platform is ISSU-aware may not take place correctly.	XDRCONF	"Verify whether the client's registration status is the same on both " "the RP and the card on which the problem is reported by comparing " "the output of 'show xdr client all' to see if the client is present or " "absent in BOTH. If so and no other error messages have been seen " "then this is a transient issue and no further action is required. " "Otherwise copy the message exactly as it appears and report it to " "your technical support representative."

Family-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Remarks
XDR-6- ISSUBADRCVTFM	6-Information	Failed to rcv_transform message - slot [chars] reason: [chars]	Unable to perform ISSU transform on incoming XDR header. Message will be ignored	XDRCOMPEN	"Get the output of \"show xdr multicast\" \"show xdr client all\" and " \"\"show issu message types [XDR client ISSU ID]\". " "Copy the message exactly as it appears and report it to your technical " "support representative."
XDR-6- ISSUBADTXTFM	6-Information	Failed to xmit_transform message - slot [chars] reason [chars]	Unable to perform ISSU transform on outgoing XDR header. Message will be ignored	XDRCOMPEN	"Get the output of \"show xdr multicast\" \"show xdr client all\" and " \"\"show issu message types [XDR client ISSU ID]\". " "Copy the message exactly as it appears and report it to your technical " "support representative."

Family-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Remarks
XDR-6- ISSUCLIENTABSENT	6-Information	XDR client [chars] absent on slot [chars]. Client functionality may be affected.	The remote slot doesn't support this ISSU client. The software will handle this by reducing client functionality locally to continue in SSO mode or by forcing the remote peer into RPR mode as appropriate. This is expected behaviour in ISSU-capable systems.	XDRCOMPEN	"No action required. This message just indicates that certain " "functionality may be reduced due to running different images together."
XDR-6- XDRINVALIDHDR	6-Information	XDR for client [chars] dropped slots:[chars] from slot:[chars] context:[dec] length:[dec]	The XDR message was dropped for the reason given.	XDRCOMPEN	"If the failure was due to an invalid context for the CEF push client " "and occurred during an ISSU upgrade then it may be safely ignored. " "Otherwise: " <u>LOGSIDACION</u>
XDR-6- XDRINVALIDHDRISSU	6-Information	XDR ISSU negotiation message for client [chars] dropped	The XDR ISSU negotiation message was dropped for the reason given.	XDRCOMPEN	"If the message occurred during an ISSU upgrade then it may be " "safely ignored. Otherwise: " <u>LOGSIDACION</u>

Family-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Remediation
XDR-6-XDRIPCPEER	6-Information	XDR IPC error occurred for peer in slot [chars] due to [chars][chars].	A general IPC related error occurred which may prevent transfer of data to other peers using the IPC mechanism	XDRCOMPEN	"Get the output of \"show xdr multicast\" and \"show xdr linecard\" \" immediately after this error. Copy the message exactly as it appears \" and report it to your technical support representative."
XDR-6-XDRMCASTINIT	6-Information	XDR mcast subsystem initialization error: [chars]	XDR non functional.	XDRCOMPEN	"A failure occurred which prohibits the XDR client from registering with \"the core. \" \"Copy the message exactly as it appears and report it to your technical \" support representative."

Family-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Remarks-Action
XDR-6-XDRREGISTRATION	6-Information	XDR failed to register [chars] client due to [chars]	Failure to register the said XDR client.	XDRCOMPDEF	"A failure occurred which prohibits the XDR client from registering with " "the core. " "Copy the message exactly as it appears and report it to your technical " "support representative."
XIPC-3-LDP	3-Error	ERRMSG_NOFLAGS	-	-	-
XMCP4CLIENT_DENIED	4-Warning	Client [chars]/[chars] denied: [chars]	An external XMCP client connection was denied. This may be due to a valid configuration reason for example <CmdBold>max-dens</CmdBold> or an <CmdBold>allow-Is</CmdBold> or it may indicate that a protection mechanism has been triggered - for example an authentication failure or DOS attack prevention	-	"Check that this is caused by configuration. If not " "and if the frequency of this message suggests that " "this may be malicious - contact your TAC security " "support immediately"
