Welcome to the Firepower Management Center

See the following URLs for detailed information about installing, connecting, configuring, and troubleshooting your Firepower Management Center.

1. Install the Management Center

For information on deploying, installing, and setting up your appliance, see the Installation Guide for your version:

<http://www.cisco.com/go/firepower-mc-install>

The Installation Guide also provides hardware specifications, information on re-imaging the appliance to factory defaults or to a new version, and information on field-replaceable components.

2. Check the Release Notes for Important Information

For important information about resolved issues, caveats, and patch or update installation procedures, make sure you review the release notes for your version and most recent patch to that version:

<http://www.cisco.com/go/firepower-notes>

3. Configure the Management Center

For information on configuring your Firepower Management Center, including adding devices to your Firepower Management Center and setting up users and policies, see the Firepower Management Center Configuration Guide for your version:

<http://www.cisco.com/go/firepower-config>

4. Firepower API Guides

The Firepower Management Center supports multiple integration points with third-party products. For more information, see the API guides for your version:

<http://www.cisco.com/go/firepower-api>
