

Cisco Secure Network Server 37x5 Firmware Upgrade Guide

[Overview](#) 2

[Upgrade and Activate the Firmware](#) 4

[Verify the Firmware Version](#) 6

Revised: September 16, 2024

Overview

This document describes how to upgrade the firmware on a Cisco Secure Network Server (SNS) 3700 series appliance.

Note We recommend that you perform graceful shutdown of the Cisco ISE services on the Cisco SNS appliance by using the **halt** CLI command before performing this upgrade. Forced shutdown or reload of the Cisco SNS server may corrupt Cisco ISE database.

Upgrade to Cisco SNS 37x5 Firmware Release 4.3.4.241063

You can upgrade to Cisco SNS 37x5 firmware release 4.3.4.241063 from the following releases:

- 4.3(4.240152)
- 4.3(2.240009)

The following files are required for this upgrade:

- SNS-37xx-BIOS-4-3-4a_ISE.pkg file: BIOS firmware for Cisco SNS 3700 series appliance
- SNS-37xx-HUU-4.3.4.241063_ISE.iso: Host Upgrade Utility (HUU) .iso file for Cisco SNS 3700 series appliance

For more information about the firmware release 4.3.4.241063, see the [Release Notes for Cisco UCS Rack Server Software, Release 4.3\(2\)](#).

Note If you are upgrading from firmware release 4.3.4.240152, you can directly perform the Host Upgrade Utility (HUU) ISO upgrade using the SNS-37xx-HUU-4.3.4.241063_ISE.iso file. For other releases, you must first upgrade the BIOS firmware using the SNS-37xx-BIOS-4-3-4a_ISE.pkg file and then perform the HUU ISO upgrade using the SNS-37xx-HUU-4.3.4.241063_ISE.iso file. You must download these files from the [Cisco ISE Software Download site](#).

Upgrade to Cisco SNS 37x5 Firmware Release 4.3.4.240152

You can upgrade to Cisco SNS 37x5 firmware release 4.3.4.240152 from the following releases:

- 4.3(2.240009)
- 4.3(2.230207)

The following files are required for this upgrade:

- SNS-37xx-BIOS-4-3-4a_ISE.pkg file: BIOS firmware for Cisco SNS 3700 series appliance
- SNS-37xx-HUU-4.3.4.240152_ISE.iso: Host Upgrade Utility (HUU) .iso file for Cisco SNS 3700 series appliance

For more information about the firmware release 4.3.4.240152, see the [Release Notes for Cisco UCS Rack Server Software, Release 4.3\(2\)](#).

Upgrade to Cisco SNS 37x5 Firmware Release 4.3(2.240009)

You can upgrade to Cisco SNS 37x5 firmware release 4.3(2.240009) from the following releases:

- 4.3(2.230207)
- 4.2(3g)
- 4.2(2f)

The following files are required for this upgrade:

- SNS-37xx-BIOS-4-3-2e_ISE.pkg file: BIOS firmware for Cisco SNS 3700 series appliance
- SNS-37xx-HUU-4.3.2.240009_ISE.iso: Host Upgrade Utility (HUU) .iso file for Cisco SNS 3700 series appliance

For more information about the firmware release 4.3(2.240009), see the [Release Notes for Cisco UCS Rack Server Software, Release 4.3\(2\)](#).

Upgrade to Cisco SNS 37x5 Firmware Release 4.3(2.230207)

You can upgrade to Cisco SNS 37x5 firmware release 4.3(2.230207) from the following releases:

- 4.2(3g)
- 4.2(2f)

The following files are required for this upgrade:

- SNS-37xx-BIOS-4-3-2c_ISE.pkg file: BIOS firmware for Cisco SNS 3700 series appliance
- SNS-37xx-HUU-4.3.2.230207_ISE.iso: Host Upgrade Utility (HUU) .iso file for Cisco SNS 3700 series appliance

For more information about the firmware release 4.3(2.230207), see the [Release Notes for Cisco UCS Rack Server Software, Release 4.3\(2\)](#).

Upgrade to Cisco SNS 37x5 Firmware Release 4.2(3g)

You can upgrade to Cisco SNS 37x5 firmware release 4.2(3g) from firmware release 4.2(2f). The following files are required for this upgrade:

- SNS-37xx-BIOS-4-2-3c-0_ISE.pkg file: BIOS firmware for Cisco SNS 3700 series appliance
- SNS-37xx-HUU-4.2.3g_ISE.iso: Host Upgrade Utility (HUU) .iso file for Cisco SNS 3700 series appliance

For more information about the firmware release 4.2(3g), see the [Release Notes for Cisco UCS Rack Server Software, Release 4.2\(3\)](#).

You must download the upgrade files from the [Cisco ISE Software Download site](#).

Note

The screenshots given in this document were taken while upgrading the firmware from 4.2(2f) to 4.2(3g). These screenshots are only for your reference.

Upgrade and Activate the Firmware

You must perform the following steps in the sequence given below to upgrade and activate the firmware:

Procedure

- Step 1** Update BIOS Firmware, on page 4
- Step 2** Activate BIOS, on page 5
- Step 3** Update and Activate other Firmwares using HUU ISO, on page 5

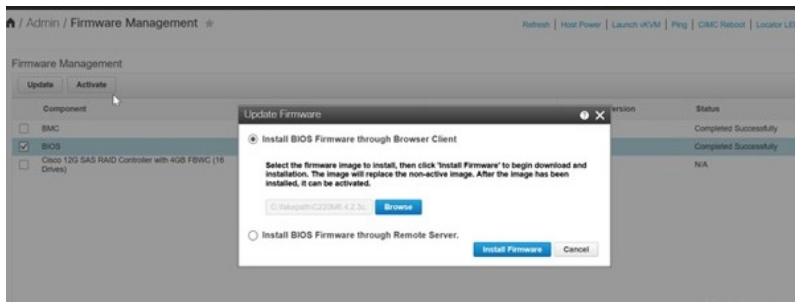

Note If the BIOS firmware is not upgraded before the HUU ISO upgrade, then the BIOS will not be loaded properly and the boot options will not be displayed.

Update BIOS Firmware

Procedure

- Step 1** Check the **BIOS** check box and click **Update**.
- Step 2** Click **Install BIOS Firmware Through Browser Client** and select the BIOS image.
- Step 3** Click **Install Firmware**.

BIOS is successfully uploaded as the backup version.

Component	Running Version	Backup Version	Bootloader Version	Status	Progress
<input type="checkbox"/> BMC	4.2(1.288)	4.2(100/PP_MFG_MFGONLY	4.2(1.288)	Completed Successfully	
<input checked="" type="checkbox"/> BIOS	C220M6 4.2.1.152_TEST_2	C220M6 4.2.3c_0_USE	N/A	Completed Successfully	
<input type="checkbox"/> Cisco 120 SAS RAID Controller with 4GB FBWC (16 Drives)	52.15.0.4236	N/A	N/A	N/A	N/A

Activate BIOS

Procedure

- Step 1** Choose **Host Power > Power Off** to manually power off the server.
- Step 2** Check the **BIOS** check box.
- Step 3** Click **Activate**.
- Step 4** Choose the BIOS version and click **Activate Firmware**.

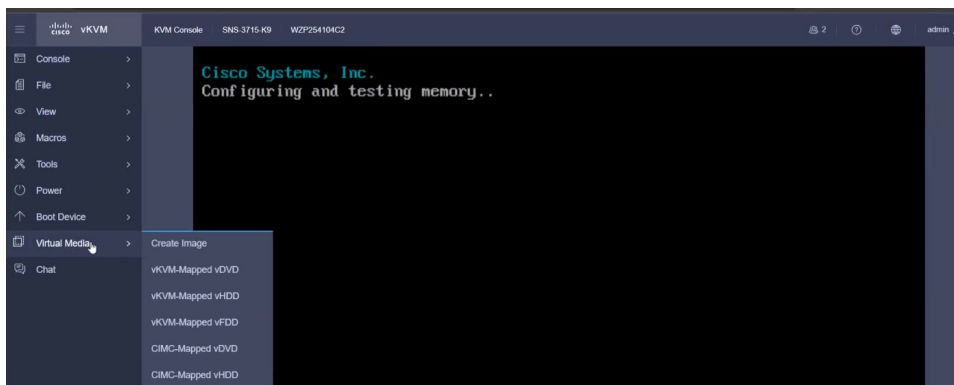

- Step 5** Choose **Host Power > Power On** after activating the BIOS.

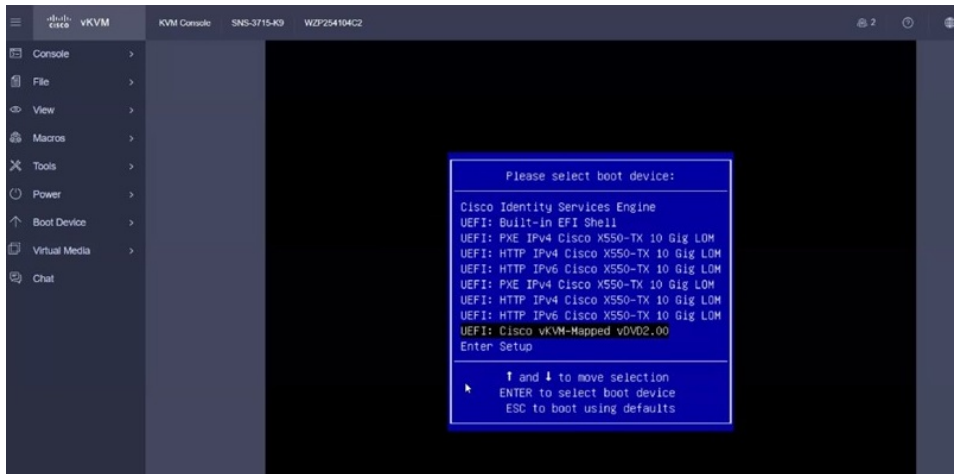

Update and Activate other Firmwares using HUU ISO

Procedure

- Step 1** In the Cisco Integrated Management Controller toolbar, click **Launch vKVM** to launch the KVM console.
- Step 2** In the KVM console, choose **Virtual Media > vKVM-Mapped vDVD**.

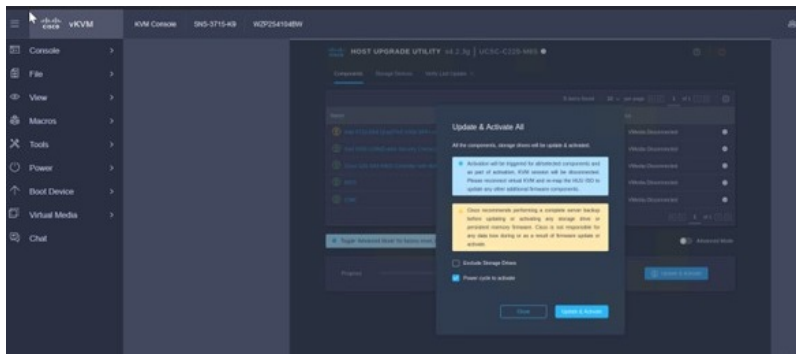

- Step 3** Click **Browse** and browse for the HUU .iso file.
- Step 4** Click **Map Drive**.
- Step 5** Press **F6** when prompted to open the **Boot Menu** window.
- Step 6** In the **Boot Menu** window, choose **UEFI: Cisco vKVM-Mapped vDVD2.00**.

Step 7 Read the Cisco Software License Agreement and click **Agree** to proceed with the update. The **Cisco Host Upgrade Utility** window appears with the list of components that are available for update. **Note** If you choose the **Reject** option, the upgrade process is canceled and the host is rebooted.

Step 8 Click **Update & Activate**.

Step 9 In the **Update & Activate All** window, check the **Power Cycle to Activate** check box and click **Update & Activate**.

Note BIOS upgrade is skipped during this step because BIOS is already upgraded to the latest version (see [Update BIOS Firmware, on page 4](#) and [Activate BIOS, on page 5](#)).

Step 10 The system is restarted after the firmware upgrade. Log in back to verify the upgraded firmware versions.

Verify the Firmware Version

Choose **Admin > Firmware Management** and verify the upgraded firmware versions in the **Running Version** column.

Admin / Firmware Management Refresh | Host Power | Launch vKVM | Ping | CIMC Reboot | Locator LED

Firmware Management ⚙

Update | Activate

Component	Running Version	Backup Version	Bootloader Version	Status	Progress
<input type="checkbox"/> BMC	4.2(3g)	4.2(1 288)	4.2(3g)	Completed Successfully	
<input type="checkbox"/> BIOS	C220M6 4.2.3c.0_ISE	C220M6 4.2.1.152_TEST_2	N/A	Completed Successfully	
<input type="checkbox"/> Cisco 12G SAS RAID Controller with 4GB FBWC (16 Drives)	52.20.0-4523	N/A	N/A	N/A	N/A

Choose **Chassis > Summary** and verify the firmware versions.
