

Cisco FirePOWER

Denial of Service (DoS) via SSL

Denial of Service (DoS) via SSL

Severity: High
Product: Cisco Firepower Threat Defense (FTD)
Version: 1.0 (Final)
CVSS: 8.6
Workarounds: No workarounds available
Cisco ID: CSCve02069

[CVE-2017-12245](#)

Denial of Service (DoS) via SSL

Denial of Service (DoS)

Cisco Firepower Threat Defense (FTD) via SSL

The vulnerability allows an attacker to perform a Denial of Service (DoS) attack on Cisco Firepower Threat Defense (FTD) devices. The attack is performed by sending a large number of SSL connections to the device, which causes the device to become unresponsive.

Denial of Service (DoS) via SSL

The attack is performed by sending a large number of SSL connections to the device, which causes the device to become unresponsive.

The attack is performed by sending a large number of SSL connections to the device, which causes the device to become unresponsive.

The attack is performed by sending a large number of SSL connections to the device, which causes the device to become unresponsive.

The attack is performed by sending a large number of SSL connections to the device, which causes the device to become unresponsive.
