## XE S3 IOS Web S3 IOS

Severity: High ID : cisco-sa-http- CVE-2022-20697

Published: 2022-04-13 16:00

Version: 1.0 : Final

CVSS Score: 8.6

Workarounds: No workarounds available

Cisco ID : CSCvx42406

Summary: A Denial of Service (DoS) vulnerability exists in Cisco IOS S3 IOS XE S3 IOS Web S3 IOS. An attacker can exploit this vulnerability to cause a Denial of Service (DoS) condition on the affected device.

### Impact

Cisco IOS S3 IOS XE S3 IOS Web S3 IOS

A Denial of Service (DoS) vulnerability exists in Cisco IOS S3 IOS XE S3 IOS Web S3 IOS. An attacker can exploit this vulnerability to cause a Denial of Service (DoS) condition on the affected device.

The vulnerability is located in the HTTP client code. An attacker can exploit this vulnerability by sending a specially crafted HTTP request to the affected device. This request causes the device to enter a Denial of Service (DoS) condition.

The vulnerability is located in the HTTP client code. An attacker can exploit this vulnerability by sending a specially crafted HTTP request to the affected device. This request causes the device to enter a Denial of Service (DoS) condition.

The vulnerability is located in the HTTP client code. An attacker can exploit this vulnerability by sending a specially crafted HTTP request to the affected device. This request causes the device to enter a Denial of Service (DoS) condition.
