Het configureren van GRE via IPSec tussen een Cisco IOS router en een VPN 5000 Concentrator die RIP en CVC gebruikt

Inhoud

Inleiding

Deze voorbeeldconfiguratie beschrijft hoe u Generic Routing Encapsulation (GRE) via IPSec kunt configureren tussen een Cisco VPN 5000 Concentrator en een Cisco IOS® router. De GRE-over-IPSec optie wordt geïntroduceerd in de VPN 5000 Concentrator 6.0(19) softwarerelease.

Het Routing Information Protocol (RIP) wordt gebruikt als het dynamische routingprotocol in deze steekproef om verkeer via de VPN-tunnel te leiden.

Voorwaarden

Vereisten

Er zijn geen specifieke vereisten van toepassing op dit document.

Gebruikte componenten

De informatie in dit document is gebaseerd op de volgende software- en hardware-versies:

- Cisco IOS-softwarerelease 12.1(5)T7
- VPN 5000 Concentrator-softwarerelease 6.0(19)

De informatie in dit document is gebaseerd op de apparaten in een specifieke laboratoriumomgeving. Alle apparaten die in dit document worden beschreven, hadden een opgeschoonde (standaard)configuratie. Als uw netwerk live is, moet u de potentiële impact van elke opdracht begrijpen.

Conventies

Raadpleeg voor meer informatie over documentconventies de technische Tips van Cisco.

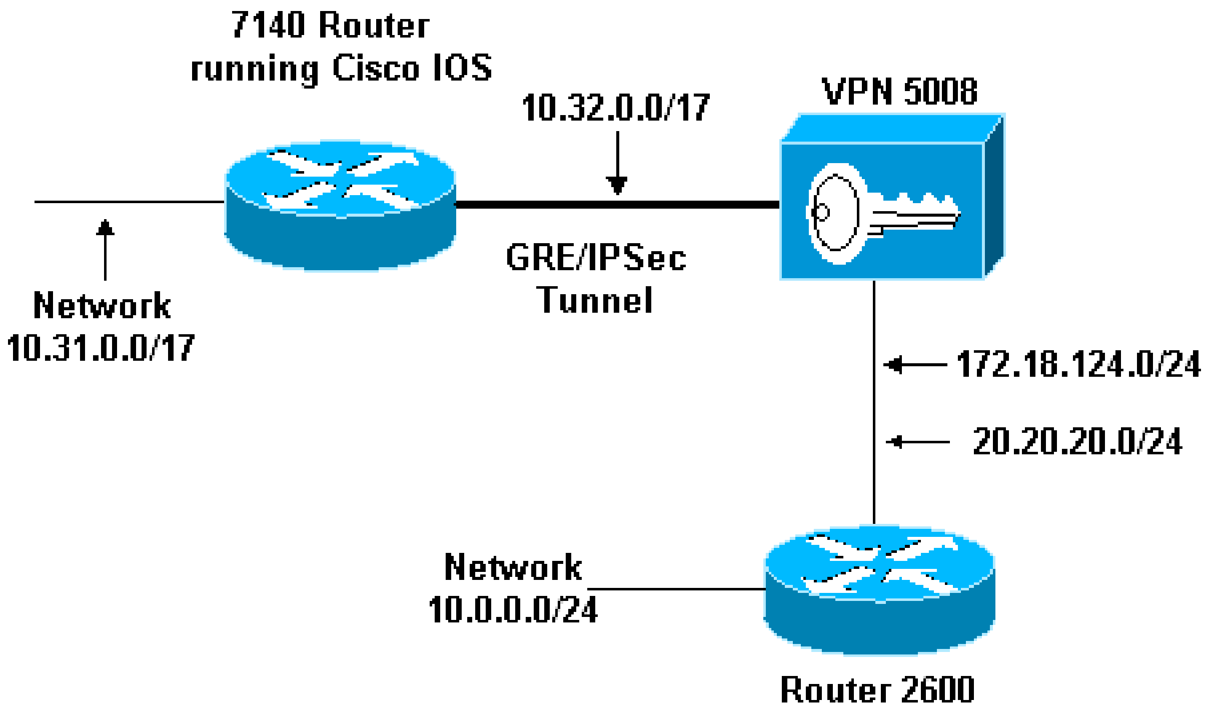
Configureren

Deze sectie bevat informatie over het configureren van de functies die in dit document worden beschreven.

N.B.: Als u aanvullende informatie wilt vinden over de opdrachten in dit document, gebruikt u het Opdrachtplanningprogramma (alleen geregistreerd klanten).

Netwerkdiagram

Dit document gebruikt de netwerkinstellingen die in dit diagram worden weergegeven.



GRE over IPSec wordt geconfigureerd tussen de Cisco IOS-router (7140) en Cisco VPN 5008 Concentrator. Achter deze apparaten worden meerdere netwerken geadverteerd via RIP, die binnen de GRE-tunnel tussen 7140 en VPN 5008 loopt.

De netwerken achter Cisco 7140 zijn:

- 10.31.0.0/17

De netwerken achter VPN 5008 zijn:

- 172.18.124.0.0/24
- 20.20.20.0/24
- 10.0.0.0/24

Configuraties

Dit document gebruikt de configuraties die hier worden weergegeven.

- Cisco IOS-router
- VPN 5000 Concentrator
- CVC

Cisco IOS-router

Verifiëren

Deze sectie verschaft informatie die u kunt gebruiken om te bevestigen dat uw configuratie correct werkt.

Bepaalde opdrachten met **show worden ondersteund door de tool** Output Interpreter (alleen voor geregistreerde klanten). Hiermee kunt u een analyse van de output van opdrachten met **show genereren.**

- **toon ip route**-toont de huidige staat van de routeringstabel.
- **tonen de crypto motor verbinding actief**-toont de pakketencryptie/decryptie teller per IPSec veiligheidsvereniging.
- **toon crypto ipsec sa**-Toont alle huidige IPSec security associaties.
- **Laat de systeemlogbuffer** zien — toont basisinformatie over syslg.
- **VPN-**sporenstortplaats - toont gedetailleerde informatie over VPN-processen.

```

Problemen oplossen

Deze sectie bevat informatie waarmee u problemen met de configuratie kunt oplossen.

Opdrachten voor troubleshooting

Bepaalde opdrachten met **show worden ondersteund door de tool** Output Interpreter (alleen voor geregistreerde klanten). Hiermee kunt u een analyse van de output van opdrachten met **show genereren.**

Opmerking: Voordat u **debug-**opdrachten afgeeft, raadpleegt u Belangrijke informatie over debug-opdrachten.

- **debug crypto isakmp** (Cisco IOS router) — Hiermee geeft u gedetailleerde informatie weer over de IKE (Main Mode) onderhandeling over Internet Key Exchange (IKE).
- **debug crypto ipsec** (Cisco IOS router) - Hiermee geeft u gedetailleerde informatie weer over IKE fase II (Quick Mode)-onderhandeling.
- **debug crypto motor** (Cisco IOS router) — Debugs het pakketencryptie/decryptie en Diffie-Hellman (DH) proces.
- **debug ip rip** (Cisco IOS router) - ontvlekt het protocol van het RIP routing.

Geef de **show ip uit** die opdracht van de VPN 5000 Concentrator.

```
VPN5002_8_A5E9C800: rip#show ip routing
